

ABSTRACT OF SANITARY REPORTS.

VOL. X. WASHINGTON, D. C., DECEMBER 20, 1895. No. 51.

TREASURY DEPARTMENT, *United States Marine-Hospital Service*.—Published in accordance with act of Congress approved February 15, 1893.

UNITED STATES.

[Reports to the Supervising Surgeon-General Marine-Hospital Service.]

Smallpox in Mississippi County, Ark.

LITTLE ROCK, ARK., December 12, 1895.

SIR: I have the honor to report as follows concerning smallpox in Mississippi County, Ark.: From the president of the Arkansas State board of health, who has just returned from Mississippi County where he made a personal investigation, I learn that since the first case in that county there have been 75 cases and 13 deaths.

The spread of the disease is checked and no more new cases are probable, as all of those who have been exposed have been detained until all danger was over.

Very respectfully,

L. P. GIBSON,

Acting Assistant Surgeon, M. H. S.

Three cases of Variola in Nogales, Ariz.

NOGALES, ARIZ., December 9, 1895.

SIR: I have the honor to report 3 new cases of smallpox (all children of the same family) in Nogales, Ariz.

Very respectfully,

W. F. CHENOWETH,

Sanitary Inspector.

Statement of Smallpox in Pennsylvania for the year ending November 1, 1895.

Name of place and county.	Date of first case.	Number of cases.	Number of deaths.	Number of houses quarantined.
Philadelphia, Philadelphia County	Oct. 1, 1894	394	52	(?)
Avondale, Chester County.....	Dec. 26, 1894	1	0	*1

Pittsburg, Allegheny County	Jan. 1, 1895	1	0	†1
Do	Mar. 27, 1895	1	0	†1
Ashbourne, Montgomery County.....	Jan. 7, 1895	9	1	7
Danville, Montour County.....	Jan. 22, 1895	1	0	1
Wilkesbarre, Luzerne County	Feb. 19, 1895	1	0	1
Total (places infected, 7).....		421	53	(?)
1894.				
Total (places infected, 52).....		439	44	(?)

* Chester County Home pesthouse.

† Municipal hospital.

Notifications have been sent to all State boards of health, city boards and bureaus of health on fifteen occasions covering the above outbreaks.

Report of Infectious Diseases in Philadelphia.

PHILADELPHIA, December 12, 1895.

SIR: Since my last report of October 1, 1895, 2 cases of smallpox have been reported in Philadelphia, no deaths. Last case was reported November 4. One case of typhus fever has been reported in Philadelphia. Two cases of cerebro-spinal meningitis have also occurred in Philadelphia, 1 resulting fatally. The number of cases of diphtheria reported in Philadelphia since October 1 has been 957; number of deaths, 314.

Yours, very truly,

BENJAMIN LEE, M. D.,
Secretary State Board of Health.

Smallpox in Martins Ferry and Bridgeport, Ohio.

WHEELING, W. VA., December 10, 1895.

SIR: I have the honor to report to you that, after several fluctuations, we are now clear of smallpox, except 1 case in the eruptive hospital, which is of a mild form and will soon recover. But the disease has broken out in 2 of our neighboring towns across the river, Martins Ferry and Bridgeport, in Belmont County, Ohio, immediately opposite Wheeling. Doctor Probst, the president of the State board of health of Ohio, has visited the 2 towns, and finds that the health authorities are doing everything in their power to prevent the spread of the disease. I inclose a slip from yesterday's Intelligeneer, which will give you all the necessary information concerning the present situation.

Respectfully,

C. F. ULRICH,
Acting Assistant Surgeon, M. H. S.

[Inclosure.]

The smallpox in Martins Ferry is in 4 houses. * * * Five of the cases are convalescing. There are 14 cases at Bridgeport. St. Clairsville has quarantined against the infected towns and there is talk of the same action being taken by other places.

COLUMBUS, OHIO, December 14, 1895.

SIR: Since June 1, 1895, smallpox has been reported in Ohio as follows: Gallipolis, 5 cases; Cleveland, 1 case; Toledo, 2 cases; East Liverpool, 1 case; Bridgeport, Martins Ferry and immediate vicinity (practically one community), 69 cases.

At the present time there is 1 case at East Liverpool, 13 cases at Bridgeport, 22 cases at Martins Ferry, and 5 cases just outside the corporate limits of Bridgeport.

Yours, very truly,

C. O. PROBST, M. D.,
Secretary State Board of Health.

Two Smallpox Cases in Wheeling.

WHEELING, W. VA., December 16, 1895.

SIR: We have had no new case of smallpox of Wheeling origin for three weeks. In that period 2 cases have arisen, 1 from exposure in Martins Ferry and the other in Bridgeport, Ohio. One of these is still in our hospital. No other case in the city.

December 20, 1885

The disease prevails extensively in the 2 towns named above, which are directly opposite this city, on the Ohio River. There are about 20 cases in Bridgeport, and over 30 in Martins Ferry. A large increase has occurred within the past week, and new cases are reported daily in the latter place. In Bridgeport the disease seems to be under much better control.

Very respectfully,

S. L. JEPSON, M. D.,
Health Officer.

One Case of Smallpox Near Pittsburg.

PITTSBURG, PA., December 16, 1895.

SIR: I am informed by the city board of health that there has developed at Knoxville, a borough just beyond the city limits, a case of smallpox in the person of a man who recently came from Wheeling, W. Va. I am also informed that, since this case is outside the city limits, the man will not be taken to the municipal pesthouse, and the immense population immediately surrounding this borough will be exposed to the danger of infection necessarily incident to the presence of the disease however guarded the premises may be. I am informed that there is no county health authority, and it is evident that serious menace to the public health exists, and in direct proportion to the measures that have been and may be taken for its protection. I will submit any further particulars.

Very respectfully,

EUGENE WASDIN,
Passed Assistant Surgeon, M. H. S.

Smallpox in Tennessee.

MEMPHIS, TENN., December 14, 1895.

SIR: I have the honor to report that smallpox has reappeared in this city, a direct consequence, as I believe, of the constant exposure to which this place has been lately subjected from neighboring communities. During November, from the 12th to the close of the month, 6 cases were reported, all the patients being colored. Four came here from Arkansas, 1 from Mississippi, and 1 originated in the city.

From December 1 to the present date 35 cases have been reported, 2 being from Arkansas, 1 from Oakville, Tenn., and 32 from the city and suburbs. Thirty-two of the patients were colored and 3 were white, one of the latter being a practicing physician.

Early in the fall of the present year smallpox was entirely stamped out in this city and its suburbs, and much credit is due the city and county health authorities for the manner in which this was accomplished. I believe that the matter will be equally well handled this time, but it is to be regretted that this community must suffer on account of the laxness of their neighbors.

Very respectfully, yours,

A. C. SMITH,
Passed Assistant Surgeon, M. H. S.

Reports of States and Yearly and Monthly Reports of Cities.

ALABAMA—Mobile.—Month of October, 1895. Estimated population, 31,076. Total deaths, 94, including phthisis pulmonalis, 6; enteric fever, 4; and whooping cough, 1.

Month of November, 1895. Total deaths, 63, including phthisis pulmonalis, 9; and enteric fever, 1.

CALIFORNIA—Los Angeles.—Month of November, 1895. Estimated population, 80,000. Total deaths, 129, including phthisis pulmonalis, 18; enteric fever, 4; diphtheria, 1; and croup, 1.

Sacramento.—Month of November, 1895. Estimated population, 30,000. Total deaths, 43, including 2 from diphtheria and 6 from phthisis pulmonalis.

San Francisco.—Month of November, 1895. Estimated population, 330,000. Total deaths, 496, including phthisis pulmonalis, 92; enteric fever, 7; diphtheria, 1; and croup, 1.

COLORADO—Denver.—Month of November, 1895. Estimated population, 106,713. Total deaths, 124, including phthisis pulmonalis, 22; enteric fever, 7; scarlet fever, 2; and diphtheria, 3.

CONNECTICUT.—Month of November, 1895. Reports to the State board of health from 166 towns having an aggregate population of 814,462, show a total of 1,041 deaths, including phthisis pulmonalis, 112; enteric fever, 30; scarlet fever, 2; diphtheria and croup, 56; measles, 2; and whooping cough, 7.

FLORIDA—Tampa.—Month of November, 1895. Estimated population, 21,000. Total deaths, 31, including 4 from phthisis pulmonalis.

MASSACHUSETTS—Brockton.—Month of November, 1895. Estimated population, 33,157. Total deaths, 38, including phthisis pulmonalis, 3, and enteric fever, 2.

Malden.—Month of November, 1895. Estimated population, 33,000. Total deaths, 39, including enteric fever, 4; and scarlet fever, 1.

Fitchburg.—Month of November, 1895. Estimated population, 26,394. Total deaths, 26, including phthisis pulmonalis, 1; and croup, 2.

Palmer.—Five months ended November 30, 1895. Estimated popu-

lation, 6,520. Total deaths, 59, including 5 from scarlet fever; enteric fever, 2, and 1 from phthisis pulmonalis.

Worcester.—Month of November, 1895. Estimated population, 98,687. Total deaths, 134, including phthisis pulmonalis, 14; enteric fever, 4; diphtheria, 12; and whooping cough, 1.

MICHIGAN.—Week ended December 7, 1895. Reports to the State board of health, from 53 observers, indicate that diarrhea, pneumonia, and remittent fever decreased in area of prevalence.

Phthisis pulmonalis was reported present during the week at 187 places, enteric fever at 61, diphtheria at 33, scarlet fever at 31, measles at 8, and smallpox at 3 places—Detroit, Park Township, and Worcester.

Grand Rapids.—Month of November, 1895. Estimated population, 80,000. Total deaths, 86, including phthisis pulmonalis, 12; and enteric fever, 1.

MINNESOTA—Minneapolis.—Month of November, 1895. Estimated population, 225,602. Total deaths, 180, including phthisis pulmonalis, 24; enteric fever, 13; scarlet fever, 1; diphtheria, 19; measles, 10; and whooping cough, 4.

NEW HAMPSHIRE—Nashua.—Month of November, 1895. Estimated population, 25,000. Total deaths, 32, including phthisis pulmonalis, 1; croup, 1; enteric fever, 2; and scarlet fever, 3.

NEW YORK—Buffalo.—Month of November, 1895. Estimated population, 335,709. Total deaths, 346, including phthisis pulmonalis, 33; enteric fever, 13; diphtheria, 26; croup, 16; measles, 1; and whooping cough, 3.

Hornellsville.—Month of November, 1895. Estimated population, 12,000. Total deaths, 17, including 2 from phthisis pulmonalis.

OHIO—Cleveland.—Month of November, 1895. Estimated population, 325,000. Total deaths, 422, including phthisis pulmonalis, 38; enteric fever, 6; scarlet fever, 2; diphtheria, 31; croup, 12; and whooping cough, 1.

PENNSYLVANIA—Williamsport.—Month of November, 1895. Estimated population, 35,000. Total deaths, 16, including enteric fever, 2; and diphtheria, 1.

RHODE ISLAND—Newport.—Month of November, 1895. Estimated population, 20,000. Total deaths, 23, including phthisis pulmonalis, 2; and enteric fever, 2.

TENNESSEE—Memphis.—Month of November, 1895. Estimated population, white, 28,064; colored, 27,859; total, 55,923. Deaths, white, 56; colored, 73; total, 129, including phthisis pulmonalis, 16; and enteric fever, 3.

Nashville.—Month of November, 1895. Estimated population, white, 54,595; colored, 33,159; total, 87,754. Deaths, white, 61; colored, 61; total, 122, including phthisis pulmonalis, 19; enteric fever, 5; scarlet fever, 2; and croup, 2.

December 20, 1895

WISCONSIN—*Milwaukee*.—Month of November, 1895. Estimated population, 250,000. Total deaths, 275, including phthisis pulmonalis, 28; enteric fever, 7; diphtheria, 15; croup, 7; and whooping cough, 2.

Cholera Notes.

[Translated in this Bureau from the "Veröffentlichungen des Kaiserlichen Gesundheitsamtes," Berlin, November 20-27, 1895.]

AUSTRIA-HUNGARY—Galicia.—From November 5 to 11, 28 cholera cases and 25 deaths were reported. Of these, 8 cases, 7 deaths occurred in 7 communes of the district of Trembowla; 7 cases, 7 deaths in 2 communes of the district of Kamiouka, Strumilowa; in 1 commune each of the districts of Sokal, Tarnopal, and Brody, 3 cases, 1 death; 1 case, 1 death; 1 case, 1 death, respectively; and in Charastkow, district of Husiatyn, 8 cases, 8 deaths. In all, from August 23, 332 cases and 220 deaths.

From November 12 to 18, 19 cases and 14 deaths were reported in Galicia. Of these, 5 cases, 6 deaths occurred in 4 communes of the district of Trembowla; in 3 communes of the district of Husiatyn, 4 cases, 3 deaths; and in 1 commune each of the districts of Barszezow, 2 cases, 2 deaths; Buczacz, 1 case; Czortkow, 3 cases, 2 deaths; Jaroslaw, 1 death; Kamiouka, Strumilowa, 1 death.

Netherlands.—During July there were 16 deaths and during August 10 deaths from cholera nostras, and during the latter month 1 death from Asiatic cholera.

Russia.—Up to October, 26 cases and deaths were reported as follows to the medical department: From September 29 to October 5, 1,448 cases, 608 deaths in the government of Volhynia, and from October 6 to 12, 1,453 cases, 582 deaths; from September 29 to October 5, in the government of Kiew, 31 cases, 24 deaths; from October 6 to 12, 28 cases, 13 deaths; from October 2 to 8, on the coast of Siberia, 1 case, 1 death; and from October 9 to 15, 3 cases.

Recent advices from the government of Podolia state that the epidemic is extinct. The 4 cases reported at Wiborg were importations from St. Petersburg, where, according to one statement received, 30 cases have been observed since November 10. According to a report made by the medical department, isolated cases resembling cholera have been observed since October 22. From October 22 to November 6, 27 cases, 13 deaths, and from November 7 to 15, 38 cases, 18 deaths were reported.

Advices from another quarter state that in all these cases the cholera vibrio was found.

Egypt.—Cases and deaths are reported as follows: In Damietta, from October 29 to November 4, 8 cases, 9 deaths; in Menzaleh, from October 25 to November 3, 132 cases, 121 deaths; in Metarieh, near Menzaleh, from October 25 to November 3, 36 cases, 39 deaths; in Bousrate, from October 26 to November 3, 82 cases, 70 deaths; in El Kurdi, from October 28 to November 3, 35 cases, 30 deaths; in Esbet el Borg, from October 30 to November 6, 20 cases, 18 deaths; in Ohmadieh, from October 25 to November 3, 78 cases, 81 deaths; in Semeita, from October 29 to November 4, 6 cases, 5 deaths; in Bagalat, from November 2 to 3, 8 cases, 1 death; in Kolonghil on November 5, and in El Baraksa on November 6, 1 death each.

Morocco.—In Tangier, from October 21 to 28, 15 cases and 8 deaths were reported; in Tetuan, from October 18 to 31, 80 cases, 84 deaths. Of these, 4 cases, 1 death, in Tangier, occurred among the non-Arabic population; and in Tetuan, 22 cases, 20 deaths.

On November 12, 2 cases which terminated fatally were reported at Tangier.

Advices from the interior, dated November 4, state that cholera is

December 20, 1895

spreading easterly in the direction of Riff, and southerly to Alkasar, halfway on the route to Fez, while the Atlantic coast line remains free from cholera.

East Indies, Calcutta.—From October 6 to 12, and from October 13 to 19, there were 24 and 35 cholera deaths, respectively.

Hawaii.—Advices of October 21 state that no cholera cases have been reported since October 3.

Current Quarantine Measures.

[Translated in this Bureau from the "Veröffentlichungen des Kaiserlichen Gesundheitsamtes," Berlin, November 20, 1895.]

Mecklenburg-Schwerin.—The ministry, under date of October 18, declares the regulations against Asiatic cholera to be out of force.

Roumania.—According to advices of November 7, the Government has issued instructions requiring all vessels arriving from Egyptian ports, in case they have not complied with the sanitary police regulations in force at some Turkish port provided with a lazaretto, to undergo disinfection at the port of Sulina, under the conditions prescribed for the disinfection of ships, passengers, and personal effects. Such vessels shall be admitted to the port of Castanza only after the expiration of seven full days since their departure from an infected port.

Portugal.—By ministerial proclamation of November 5 the port of Para is declared infected since October 5.

Egypt.—The resolution of the council of health of October 25 with regard to vessels which have passed through the Suez canal without communicating with the shore is completed by a resolution of November 5 to the following effect:

Not only those vessels which are provided with outward opening coal bunkers may coal at Port Said, in quarantine and under the usual inspection, but all other vessels lying in quarantine which have complied with the following precautionary regulations:

The sanitary guards which have accompanied the vessel from Suez are to remain on board during the entire period of coaling. The part of the gangway used by the coal carriers is to be isolated from the rest of the ship. A wooden partition is to be erected to separate the coal carriers from persons on board.

After the loading is completed the part of the bridge over which the coal carriers have passed is to be disinfected with carbolic solution by the guard. In all cases the ship's bill must receive a certificate to the effect that coaling has been performed under all the requirements named and in presence of the sanitary guard.

The council further permits vessels which have passed through the canal to unlade or take on a cargo of unsuspicious articles, but requires that the nature of such cargo be stated on the ship's bill.

Morocco.—According to advices of November 4, quarantine at other ports of Morocco against Tangier is suspended by order of the council of health.

EGYPT.

Decrease of Cholera in Egypt.

ALEXANDRIA, EGYPT, November 29, 1895.

SIR : I forward by this mail the official reports for this last week.

I have great pleasure in announcing that the cholera reports for the last twenty-four hours are very satisfactory, the whole district along

the Bahr Sagheir being free, with the exception of a single case at Manzaloum. * * *

Yours, faithfully,

J. F. LOVE, M. D.

[Inclosure.]

ENGLAND.

Contradiction of Reported Cases of Yellow Fever on Norwegian Ship Mindet, from Mobile.

NEWCASTLE ON TYNE, December 2, 1895.

SIR: In answer to your letter of November 18 respecting the reported cases of yellow fever on board the Norwegian ship *Mindet*, recently arrived in this port from Mobile, I inclose herewith a letter from the medical officer of health of this port on the subject, and on further application to the Norwegian consulate here, I learn that the *Mindet* did not touch at any intermediate place on her voyage from Mobile.

The report here of yellow fever on the arrival of this vessel was immediately contradicted, or I should have reported the matter to the Department of State.

I am, sir, your obedient servant,

W.M. L. CAMPBELL,
United States Consul.

[Inclosure.]

DEPARTMENT OF MEDICAL OFFICER OF HEALTH,
Newcastle upon Tyne, November 30, 1895.

SIR: The statement as to the cases of illness being yellow fever is incorrect. The *Mindet* arrived here on the 11th instant, having on board 11 men suffering from malarial fever. Two men had died from the same disease on the voyage. The 11 men were removed to the Tyne Port floating hospital. They have all recovered, and the last two of them were discharged from hospital yesterday. I am not aware that the vessel touched at any port between Mobile and the Tyne.

I beg herewith to return the letter you left for me.

Yours, faithfully,

The UNITED STATES CONSUL, *Newcastle upon Tyne.*

HENRY E. ARMSTRONG.

GIBRALTAR.

Quarantine Notice.

GIBRALTAR, November 20, 1895.

With reference to the notice of the 16th September last, it has been decided by the board of health to admit to free pratique all arrivals from ports in Morocco situated beyond the radius of 165 kilometers, measured in a direct line, from Tangier or Tetuan.

By order,

JOHN C. KING,
Secretary to the Board.

TURKEY.

Cholera in Turkey—Sanitary Reports of Constantinople.

[Report No. 140.]

CONSTANTINOPLE, November 9, 1895.

SIR: Nearly every week there are 1 or 2 cholera cases to be registered in the town of Constantinople. On the 21st of last October, for instance, a cholera case occurred at Galata which proved fatal. On the 23d of the same month another cholera case occurred at Galata. This latter cholera case was very light, and the patient recovered very quickly. This latter case occurred in a house in which several cholera cases and cholera deaths have occurred previously. On the 31st of October a fresh cholera case occurred at Haskioi. This case also proved fatal. When a cholera case occurs the authorities, as I have already mentioned in my previous reports, disinfect and surround the patient's house with a sanitary cordon.

Besides cholera, we have to deal with diphtheria and influenza. Cases of diphtheria as well as influenza are very numerous and are scattered all around the town. I do not know if there is any relation between the south winds which prevail and diphtheria (see report No. 120, under date of April 12, 1895). Roux's antidiphtheric serum is used, and with great benefit to the affected children.

I am glad to state no smallpox deaths have been registered for the last week.

The sanitary news received from the provinces is good. It is to be greatly feared that next year all Asia Minor will be in a wretched condition. Nobody can plough or attend to any kind of work on account of the troubles and massacres which every day are announced from Armenia and all Asia Minor. It is easy, then, to imagine in what a miserable condition the population of those provinces will be.

Cholera news from Egypt states that the epidemic is spreading, but very slowly. Semita, Abynwita, Es-bet-el-borg, and Bagalah are the names of the fresh localities affected by cholera. * * *

SPIRIDION C. ZAVITZIANO.

[Report No. 141.]

CONSTANTINOPLE, November 27, 1895.

SIR: On the 12th instant an aged woman died at Yenikivi on the Bosporous after a short illness, the symptoms of which resembled those of cholera, though some of them were lacking. No microscopical examination of the dejecta has been made, but it has been considered as a cholera case and the house surrounded by a sanitary cordon for ten days. Since the latter date of the 12th instant no case has been registered.

Cases of diphtheria, as well as cases of influenza and typhoid fever, are occurring in Constantinople. Every year at this season many cases of typhoid fever exist which, as I have stated in my previous reports, do not prove fatal. The diphtheria cases may be due to the construction of the quays, by which construction the drains are nearly closed. So many cases of diphtheria have never been observed before. This subject has been discussed at the last meeting of the international sanitary commission.

In the vilayet of Brussa, at the village of Domavitch, Semdjak (dis-

trict) of Ertagrul, an outbreak of cholera has occurred. The authorities of Brussa have sent a physician there in order to take the necessary steps and check the spread of the disease. Seven cholera deaths have already been registered. In the vilayet of Damascus, also, cholera still continues. During these last days 25 cholera cases were registered every day. In villages of Ezuaye and Slaneida, near Tripoli (Syria), some cholera cases have been observed. We have not any details at the present.

In Egypt cholera seems abating. Since the 12th instant no fresh cholera case has been observed in Mansurah. Since the beginning of the epidemic 848 cholera cases have been registered, of which 686 proved fatal. The city of Pergamus, in Asia Minor, has been thoroughly shaken and nearly destroyed by a strong earthquake. The inhabitants, as well as the authorities, are living out of doors.

SPIRIDION C. ZAVITZIANO.

STATISTICAL REPORTS.

BERMUDA.—Week ended November 29, 1895. Estimated population, 15,013. One death. No deaths from contagious diseases.

CHILE—Antofagasta.—Month of October, 1895. Estimated population, 14,000. Total deaths, 37, including phthisis pulmonalis, 4; and enteric fever, 1.

FRANCE—St. Etienne.—Two weeks ended November 20, 1895. Estimated population, 133,443. Total deaths, 123, including 2 from enteric fever.

GREAT BRITAIN—England and Wales.—The deaths registered in 33 great towns of England and Wales during the week ended November 30, correspond to an annual rate of 17.9 a thousand of the aggregate population, which is estimated at 10,591,530. The lowest rate was recorded in Croydon, viz, 11.3, and the highest in Blackburn, viz, 29 a thousand.

London.—One thousand four hundred and fifty-five deaths were registered during the week, including smallpox, 1; measles, 10; scarlet fever, 17; diphtheria, 63; whooping cough, 19; enteric fever, 21; diarrhea and dysentery, 14. The deaths from all causes corresponded to an annual rate of 19.5 a thousand. In greater London 1,850 deaths were registered, corresponding to an annual rate of 15.9 a thousand of the population. In the "outer ring" the deaths included 10 from diphtheria, 7 from measles, and 2 from smallpox.

Ireland.—The average annual death rate represented by the deaths registered during the week ended November 30 in the 16 principal town districts of Ireland was 25.3 a thousand of the population. The lowest rate was recorded in Armagh, viz, 7, and the highest in Limerick, viz, 42.1 a thousand. In Dublin and suburbs 168 deaths were registered, including enteric fever, 4; measles, 1; scarlet fever, 1; diphtheria, 1; and whooping cough, 2.

Scotland.—The deaths registered in 8 principal towns during the week ended November 30 corresponded to an annual rate of 17.4 a thousand of

the population, which is estimated at 1,500,435. The lowest mortality was recorded in Leith, viz, 11.4, and the highest in Perth, viz, 24 a thousand. The aggregate number of deaths registered from all causes was 503, including scarlet fever, 8; measles, 1; diphtheria, 6; and whooping cough, 11.

RUSSIA—*Riga*.—Month of September, 1895. Estimated population, 215,000. Total deaths, 456, including phthisis pulmonalis, 33; enteric fever, 2; scarlet fever, 12; diphtheria, 6; croup, 1; and whooping cough, 3.

SPAIN—*Barcelona*.—Month of October, 1895. Estimated population, 440,000. Total deaths, 592, including smallpox, 12; diphtheria, 15; and enteric fever, 56.

TURKEY—*Constantinople*.—Month of August, 1895. Estimated population, 700,000. Total deaths, 874, including 14 from smallpox.
